

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

Claims 1-18 Canceled

19. (new) A laundry and cleaning composition comprising:

- a.) a detergent ingredient; and
  - b.) product of reaction between:
    - (i) an amino functional polymer comprising more than one primary and/or secondary amine group, said amino functional polymer having an Odor Intensity Index of less than that of a 1% solution of methylantranilate in dipropylene glycol, and
    - (ii) a perfume component selected from a ketone, an aldehyde, and mixtures thereof;
- said product of reaction having a Dry Surface Odor Index of more than 5.

20. (new) A composition according to Claim 19 wherein said amino functional polymer comprises more than 10 primary and/or secondary amine groups.

21. (new) A composition according to Claim 19 wherein said amino functional polymer has a molecular weight of from 150 to  $2 \times 10^6$ .

22. (new) A composition according to Claim 21 wherein said amino functional polymer has a molecular weight of from 400 to 50,000.

23. (new) A composition according to Claim 22 wherein said amino functional polymer has a molecular weight of from 600 to 40,000.

24. (new) A composition according to Claim 19, wherein said amino functional polymer is selected from the group consisting of polyvinylamines, derivatives of polyvinylamines, and

copolymers of polyvinylamines, alkylene polyamine, polyaminoacid, copolymers of polyaminoacid, cross-linked polyaminoacids, amino substituted polyvinylalcohol, polyoxyethylene bis amine or bis aminoalkyl, aminoalkyl piperazine, derivatives of aminoalkyl piperazine, linear or branched N,N'-bis-(3-aminopropyl)-1,3-propanediamine, and mixtures thereof.

25. (new) A composition according to Claim 19, wherein said amino functional polymer is selected from the group consisting of polyvinylamines having a molecular weight of from 600 to 50,000; amino substituted polyvinylalcohol having a molecular weight of from 400-300,000; polyoxyethylene bis [amine]; polyoxyethylene bis [6-aminoethyl]; N,N'-bis-(3-aminopropyl)-1,3-propanediamine; 1,4-bis-(3-aminopropyl) piperazine, polylysine, cross-linked polylysine, and mixtures thereof.

26. (new) A composition according to Claim 25, wherein said product of reaction is present in an amount of from 0.0001% to 10% by weight of the laundry and cleaning composition.

27. (new) A composition according to Claim 43, wherein said product of reaction is present in an amount of from 0.001% to 5% by weight of the laundry and cleaning composition.

28. (new) A composition according to Claim 44, wherein said product of reaction is present in an amount of from 0.01% to 2%, by weight of the laundry and cleaning composition.

29. (new) A composition according to Claim 19, wherein said perfume component comprises a perfume aldehyde selected from the group consisting of 1-decanal, benzaldehyde, florhydral, 2,4-dimethyl-3-cyclohexen-1-carboxaldehyde; cis/trans-3,7-dimethyl-2,6-octadien-1-al; heliotropin; 2,4,6-trimethyl-3-cyclohexene-1-carboxaldehyde; 2,6- nonadienal; alpha-n-amyl cinnamic aldehyde, alpha-n-hexyl cinnamic aldehyde, p.t. buccinal, lyral, cymal, methyl nonyl acetaldehyde, hexanal, trans-2-hexenal, and mixtures thereof.

30. (new) A composition according to Claim 19, wherein said perfume component comprises a perfume ketone selected from the group consisting of Alpha Damascone, Delta Damascone, Iso Damascone, Carvone, Gamma-Methyl-Ionone, Iso-E-Super, 2,4,4,7-Tetramethyl-oct-6-en-3-one,

Benzyl Acetone, Beta Damascone, Damascenone, methyl dihydrojasmonate, methyl cedrylone, and mixtures thereof.

31. (new) A composition according to Claim 19 wherein said perfume component comprises a perfume having an Odor Detection Threshold lower or equal to 1 ppm.

32. (new) A composition according to Claim 31 wherein said perfume component comprises a perfume having an Odor Detection Threshold lower or equal to 10 ppb.

33. (new) A composition according to Claim 19 wherein said perfume component comprises a perfume selected from the group consisting of undecylenic aldehyde, undecalactone gamma, heliotropin, dodecalactone gamma, p-anisic aldehyde, para hydroxy-phenyl-butanone, cymal, benzyl acetone, ionone alpha, p.t.bucinal, damascenone, ionone beta and methyl-nonyl ketone, and/or mixtures thereof.

34. (new) A composition according to Claims 19, wherein the composition comprises a clay.

35. (new) A process of making the laundry and cleaning composition of Claim 19, said process comprising the steps of:

- a.) performing a reaction product having a Dry Surface Odor Index of more than 5, said reaction product being the reaction product product of reaction between:
  - (i) an amino functional polymer comprising more than one primary and/or secondary amine group, said amino functional polymer having an Odor Intensity Index of less than that of a 1% solution of methylantranilate in dipropylene glycol; and
  - (ii) a perfume component selected from a ketone, an aldehyde, and mixtures thereof,
- b.) combining said preformed reaction product with one or more deterative ingredients.

36. (new) A method of delivering residual fragrance to a surface, said method comprising the steps of contacting said surface with a product of reaction according to Claim 19 and thereafter contacting the treated surface with a material so that the active from the product of reaction is released.

37. (new) A method according to Claim 36, wherein said material is water.
38. (new) A method according to Claim 36, wherein said surface is a fabric.
39. (new) A method according to Claim 36, wherein said surface is a tile and/or ceramic.
40. (new) A method of providing improved fabric appearance, improved protection against fabric wear and improved color care to a fabric surface, said method comprising the step of contacting said surface with product of reaction between an amino functional polymer comprising at least one primary and/or secondary amine group, said amino functional polymer having an Odor Intensity Index of less than that of a 1% solution of methylantranilate in dipropylene glycol, and a perfume component selected from a ketone, an aldehyde, and mixtures thereof; or a composition comprising said product of reaction.
